Press release

20 April 2016

Right to the point!

The Apex Jacket from KLIM represents design, function and quality in perfect symbiosis. The apex – that particular point of a corner, where all physical parameters are perfectly balanced and that, when met, enables the maximum cornering speed – not only gave the jacket its name but also served as an inspiration and model for its developers.

The **KLIM Apex Jacket** is a premium CORDURA jacket for dedicated sport touring riders. "GUARANTEED TO KEEP YOU DRY®" - its high quality, breathable 3-layer GORE-TEX® Pro Shell laminate guarantees the wearer complete wind and weather protection. A ventilation system controlled via waterproof zip fastenings ensures constant wearer comfort.

Fine, perforated leather appliqués on the shoulders and elbows, and high-quality level 2 certified D30® EVO Pro XT protectors (back, shoulders, elbows) guarantee proactive protection. 3M Scotchlite™ reflectors in optimised safety positions ensure top visibility, even at night and in adverse lighting conditions.

Sufficient storage space, a sporty cut and practical details complete the jacket, which has been finished to the highest quality and technical design standards.

"K Fifty 1" jeans: Classic 5-pocket jeans made of a Cordura / cotton mix, that actually look and feel like a "normal" pair of jeans. Available in 2 colour variants, Dark Blue and "washed" Light Blue. The jeans are equipped with all essential safety features: D30 hip and knee protectors, Poron XRD coccyx protector and extensive Kevlar reinforcement in the hip, thigh and knee areas.

The **Apex Jacket** is available in grey, black and hi-vis (yellow/black) and sizes range from SM to 3XL, from € 849.00. The **"K Fifty 1" Jeans** are available in waist sizes 30 to 42 and in extra long sizes (+ 7cm), from € 289.00.
